

The Benefits of a Scheduled Sealcoat Program

Extend pavement service life

Sealcoating with CrafcO sealers protects asphalt pavement from water, oil, fuel, UV rays, de-icing salts, and other harmful elements. If pavement is left untreated, those harmful elements degrade the top layer soon after the asphalt installation, causing surface cracks. This allows water to penetrate and make the pavement brittle and susceptible to structural damage. **It's best to begin a sealer strategy at the start of a pavement's life, but if you've waited until your pavement has started to show signs of aging, it's not too late. CrafcO pavement sealers can preserve pavement life and beautify older pavement.**

Enhance appeal of your property

Sealcoating with CrafcO's asphalt pavement sealer products restores that rich, black color we all love to see on asphalt surfaces. It enhances the visual appearance of parking lots and driveways, increasing the value of one's property and resonating with drivers, customers, and others.

Reduce costly repairs, saving you money

By preserving the quality of your pavement with periodic sealcoating, the need for major repairs, such as asphalt overlays, is reduced, if not eliminated. When you appropriately seal your surface, it will pay for itself exponentially over the life of your pavement. **According to the Pavement Coatings Technology Council, homeowners can save approximately \$8,000 on an 18-foot by 30-foot driveway with regularly scheduled sealcoating over the life of a 30-year mortgage.**

Where to get Action Pave

With our extensive sealer delivery network, we have you covered:

- Fill up at any CrafcO Supply Center
- Fill up at any of our authorized distributors
- Get delivery to your tanks
- Get tanker delivery to your job site

- Professional-grade sealers
- Resources and experience to help your business grow
- Strong supply network to meet customers' sealcoating needs

The CRAFCO® Advantage

For more than 40 years, Crafcoco has delivered quality, innovation, and value, helping thousands of agencies and contractors worldwide preserve and protect their pavement surfaces.

High-Performance Sealers

Crafcoco's Action Pave® sealers are manufactured to provide asphalt pavement maximum protection against oil, gasoline, salt, sun, and weather — while also enhancing its visual appearance. Our proprietary, climate-specific formulations meet or exceed both Federal and FAA specifications. Whether you need a traditional refined tar sealer or an evolved solution, Crafcoco has you covered.

Commitment to Quality

Our Action Pave sealer has passed extensive testing to achieve the highest standards of quality. But we don't stop there. Together with STAR (Specialty Technology and Research), Inc., we're collaborating on the latest research and innovations to produce a variety of cutting-edge sealers that deliver reliable consistency in performance and appearance.

Exceptional Service and Support

The success of our customers and partners is our top priority. Crafcoco's expert team delivers superior service, ensuring a positive experience every time. Plus, we have numerous tools and resources available through our sales representatives, Crafcoco Pavement Preservation Supply Centers, and website (crafcoco.com/documents). Specific support materials include:

- Brochures
- Safety Data Sheets
- Specifications
- Product Data Sheets
- Installation Instructions
- Certificates of Compliance

Visit crafcoco.com/sealcoating to register for our **Sealcoat Support Toolbox**, our special kit loaded with tips and marketing resources to help you grow your business.

Action Pave® PAVEMENT SEALERS

Crafcoco's Action Pave comes in two formulations:

Action Pave® RT — A heavy-duty, concentrated, refined tar sealer. Proven to produce high-quality results, Action Pave RT represents the reliable workhorse that has delivered for decades. RT benefits include:

- Extends asphalt pavement life
- Provides a new, rich, black color
- Long-lasting protection

Action Pave® LP — A heavy-duty, concentrated, petroleum resin sealer. Action Pave LP is an innovative and eco-conscious alternative to refined tar. LP benefits include:

- Extends asphalt pavement life
- Provides a new, rich, black color
- Minimal odor, no skin irritation
- Fast drying and curing

PREMIUM LEVELS OF PROTECTION

Action Pave RT and LP come in a variety of grades, depending on the level of protection you need:

Classic — Our professional-grade sealer delivers a restored, rich, black color, while providing reliable protection and performance for pavement. **We recommend reapplying every 1 to 3 years.**

Pro — Our professional-grade sealer, improved with a proprietary blend of polymers that provide increased resistance to water and UV degradation, while maintaining the rich, black color longer. **We recommend reapplying every 2 to 4 years.**

Supreme — Our superior-grade sealer doubles the proprietary blend of polymers of Pro to deliver our highest-performing, longest-lasting sealer. **We recommend reapplying every 2 to 6 years.**

Aviator — Formulated exclusively for airports, this premium-grade refined tar sealer is manufactured and adjusted to meet FAA Specification P-631. **We recommend reapplying every 2 to 3 years for runway sections and every 3 to 4 years for non-runway pavements.**

Crafcoco's Action Pave sealers provide the BEST protection and a fresh, NEW look your pavement deserves.

ELIMINATE GUESSWORK AND SAVE TIME & MONEY

In addition to concentrate formulations, Action Pave pavement sealers (RT and LP) are available in a variety of different forms for convenience. Options include:

- Our Ready Mix contains our concentrate diluted to the proper application viscosity so it can be applied immediately, reducing time and labor costs.
- Our Sand Mix is carefully measured and pre-mixed with the appropriate amount of sand and concentrate for a perfect proportion.
- The ultimate in convenience, our Sand-Ready Mix is properly diluted with the sand proportion already blended into the concentrate.

Not all forms are available from all manufacturing locations.

Action Pave® Sealer Selection Chart

	Action Pave RT	Action Pave LP*	
BENEFIT	Extends life of asphalt pavements	Yes – Better	Yes
	Provides a new, rich, black color	Yes	Yes – Better
	Provides a barrier to weather	Yes	Yes
	Helps snow melt faster	Yes	Yes
	Saves money on pavement maintenance	Yes	Yes
APPLICATION	Long-lasting protection	Yes	Yes
	Fast dry and cure	Yes	Yes – Better
	Water cleanup	Yes	Yes
SPECIFICATIONS	Sand loading, lbs.	2-5	2-5
	Functionally meets FAA P-630, P-631	Yes	Yes
	Functionally meets ASTM Specifications	Yes	Yes
	Resistance to fading	Yes	Yes
	Resistance to chemicals & fuel	Yes	Yes
INSTALL	Resistance to UV fading	Yes	Yes
	Resistance to water & de-icing salts	Yes	Yes
	Easy to apply	Yes	Yes
	Causes skin irritation	Yes	No
	Emits significant odor	Yes	No
	Personal Protective Equipment required	Yes	Yes

*Environmentally friendly alternative to refined tar

Our proprietary blend of polymers added to Pro, Supreme, and Aviator increase resistance to harmful elements, improve durability, reduce drying time, and extend longevity. Contact your Crafcoco Sales Representative or Supply Center for more information.
